see separate sheet

EXAMINATION REPORT - SEPARATE SHEET

Section III

Claim 13 relates to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of this claim (Article 34(4)(a)(i) PCT).

Section V

1. Reference is made to the following documents:

D1: WO 96 15 096 A

D2: WO 97 43 247 A

D3: WO 98 09 940 A

D4: WO 98 22 436 A

D5: BARNES P J: Trends in Pharmacological Sciences, GB, Elsevier Trends Journal, Cambridge, vol. 19, no. 10, 1998 (1998-10), pages 415-423.

D6: WEHR A: 'Proteasehemmer-nicht nur bei AIDS wirksam.' Deutsche Medizinische Wochenschrift, vol. 123, no. 1-2,1998, pages a9-10.

D7: RICOU B ET AL: 'Matrix Metalloproteinases and TIMP in Acute Respiratory Distress Syndrome' Am J Respir Crit Care Med, vol. 154, 1996, pages 346-352.

Unless otherwise indicated, reference is made to the relevant passages emphasized in the International Search Report.

2. Novelty (PCT Art. 33(1) and (2))

Several biarylbutyric, -hydroxybutyric and -pentanoic acid derivatives are known for their MMP (matrix metalloproteinase) inhibiting activity (see e.g. D2-D4). In particular D1 discloses the activity of compounds which fall under the general formula (I') of present claim 9 as inhibitors of MMPs, and in particular also the compound in claim 11 (see Table XX in D2 (the compound in claim 10 is disclosed as a racemate only). Therefore, the subject-matter of present claims 12 and 13 does not appear to be novel.

•

EXAMINATION REPORT - SEPARATE SHEET

3. Inventive Step (PCT Art. 33(1) and (3))

D1 discloses the fact that several of the compounds listed in present claim 6, 9 and 11 are inhibitors of MMP enzymes. The technical problem can be seen as to provide the use of MMP inhibitors against respiratory diseases. However, D5-D7 disclose the links which exist between the activity of these enzymes and some respiratory and inflammatory diseases. Therefore, it would be obvious to the skilled person to try compounds, which are known as MMP inhibitors, in the preparation of medicaments against said diseases. This affects the inventivity of present claims 6, 9-11,14-17. As far as the new compounds in claims 7,8 are concerned, the technical problem has to be rephrased as to obtain alternative biarylbutyric acid derivatives intended to be used as MMP inhibitors.

In this context, the simple resolution of the racemate into enantiomers, as it is performed for the 4'-ethoxy and the 4'-chlorine isoindol derivative cannot be considered inventive. Indeed, if a racemate is known to have pharmacological properties (as it appears from D1 in the case of these two compounds), it would be obvious to the skilled person to isolate the pure single optical isomers and test them in the same pharmacological context, in order to reduce the dosage or the side effects, or to obtain a more specific action. In addition, for the 4'-chlorine compound, the separation of the enantiomers is already hinted at in D1, Table XX.

Since it is not predictable which biological effect will be brought about by a chemical change, the chemical modifications which give rise to the other compounds in present claim 7 could account for the presence of an inventive step if any technical effect could be shown for them, which is not the case (see remarks on Art. 5 and 6 PCT below).

Industrial Applicability (PCT Art. 33(1) and (4)) 4.

For the assessment of the present claim 13 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound

for the manufacture of a medicament for a new medical treatment.

Section VI

5. The potentially relevant intermediate document WO 99 18079 A, published on 15 April 1999 (filing date 23.9.98, priority date 7.6.95, publication date 6.10.97) is quoted according to Rules 70.10 and 64.3 PCT.

Section VIII

6. The fact that the compounds of the present application can be used for the preparation of medicaments against respiratory diseases does not appear to be sufficiently supported (contrary to Art. 5 PCT) by the present specification. Indeed, it is only shown for 5 compounds that they are able to inhibit MMP-12 (table 3), and for other 2 selectivity data are provided (table 4). However, in the title to table 3 MMP-13 is mentioned. In table 4 a mixture of IC₅₀ and K_i data are given. This lack of precision renders the data so unclear, contrary to Art. 6 PCT, that it appears to be impossible to establish whether the technical problem has been solved at all.

Box I Observations where certain claims were found	unsearchable (Continuation of item 1 of first sheet)
This International Search Report has not been established in res	pect of certain claims under Article 17(2)(a) for the following reasons:
Claims Nos.: because they relate to subject matter not required to be	searched by this Authority, namely:
2. X Claims Nos.: 1-5 because they relate to parts of the International Applicat an extent that no meaningful International Search can b see FURTHER INFORMATION sheet PC	
Claims Nos.: because they are dependent claims and are not drafted	in accordance with the second and third sentences of Rule 6.4(a).
Box II Observations where unity of invention is lacki	ng (Continuation of item 2 of first sheet)
This International Searching Authority found multiple inventions in	n this international application, as follows:
As all required additional search fees were timely paid be searchable claims.	y the applicant, this International Search Report covers all
As all searchable claims could be searched without effortion of any additional fee.	rt justifying an additional fee, this Authority did not invite payment
As only some of the required additional search fees were covers only those claims for which fees were paid, spec	e timely paid by the applicant, this International Search Report ifically claims Nos.:
4. No required additional search fees were timely paid by t restricted to the invention first mentioned in the claims; if	he applicant. Consequently, this International Search Report is t is covered by claims Nos.:
	e additional search fees were accompanied by the applicant's protest. protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

Claims Nos.: 1-5

Present claims 1-5 relate to the use of an extremely large number of possible compounds for the preparation of medicaments against respiratory diseases. Support within the meaning of Article 6 PCT and/or disclosure within the meaning of Article 5 PCT is to be found, however, for the use of a very small proportion of the compounds among those listed in the claims 1-5 only. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible. Consequently, the search has been carried out for the claims which appear to be supported and disclosed, namely claims 6-17.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
